

Water Leak Detection scheduled for late November

Council will be undertaking water leak detection work on water pipes in Putaruru at the end of November.

Why?

Because we have to; reducing water consumption forms part of our new water take resource consent conditions.

Do ratepayers have a responsibility?

Yes, if a water leak is detected on private property, Council will advise the homeowner of the problem and it will need to be repaired, at the homeowners' cost.

Why do we need to fix water leaks?

Water leaks mean that we are not conserving our water effectively. And our new resource consent requires us to reduce water usage.

**“Detecting water leaks and fixing them
reduces water consumption...”**
