Consultation required:	Consult as part of the Long Term Plan
Record number:	DocSet ID number - 323711
Associated documents:	Long Term Plan 2015-25

### 8.1. Strategy Objectives

- Provide regulatory services that meet legislative requirements while supporting our customers.

### 8.2. Link to Council Outcomes

- **A quality regulatory service:** Deliver a local regulatory service that keeps our community safe and is cost effective to households and businesses, now and in the future.

### 8.3. Background and Current Position

The development of the business case management approach to dealing with larger projects or projects requiring the services of more than one regulatory department has made a significant difference to supporting business development. Individual regulatory functions are focused on increasing their skill levels and working through the ever increasing requirements from central government to enforce regulations in our community eg new building regulations, liquor licensing and food safety.

### 8.4. Strategic Priorities

- Continue to develop the business case management approach.

### 8.5. Year 1 Action Plan (2015-16)

Action	Position Responsible	Date	Resource Requirement
